Digital Technologies: Simplicity and Predictability

NAPOLI

15-16 September 2023

Hotel Royal Continental

Via Partenope, 38

Digital technologies are transforming dentistry, increasing diagnostic precision and the suitability of treatment plans. The introduction in dentistry of intraoral, desktop and face scanners, digital condylographs, and cone beam computed tomography (CBCT) allows the acquisition of all 3D patient data. These data are automatically processed by artificial intelligence to obtain a complete virtual 3D model of the patient. The "virtual patient" is an essential tool for artificial intelligence-assisted diagnosis and for planning surgical, prosthetic and orthodontic treatments. The software and modern virtual and augmented reality systems (holography) allow for planning the 3D treatment and even remotely discussing with the dental laboratory. Moreover, they represent crucial tools for communicating with the patient. Finally, milling machines, 3D printers and laser sintering units allow the production of fixed and removable prosthetic restorations, models and surgical templates, bite splints, and aligners.

The procedures become "minimally invasive" and "biologically inspired": ceramic materials with exceptional biological and aesthetic performance are used, and treatments are patient-centred, with "custom-made" solutions. These solutions are designed and manufactured for the specific anatomical-functional needs of each patient.

The National Association of Italian Dentists (ANDI) and the Digital Dentistry Society (DDS) look forward to welcoming you to the Congress on Friday, 15th and Saturday, 16th September 2023, in Naples.

Dr. Bruno Oliva
ANDI Cultural Secretary

Prof. Fernando Zarone
Ambassador of DDS Italy

Dr. Angela Rovera
ANDI National Secretary

DIGITAL TECHNOLOGIES: SIMPLICITY AND PREDICTABILITY

FRIDAY, SEPTEMBER 15

08.30-09.00 Registration

08.30-13.00 **Pre-Congress Session**
Digital Orthodontics: hands on!
Vincenzo D'Antò, Giorgio Oliva

14.30-15.00 **Greetings from Authorities**

GUIDED SURGERY

15.00-15.30 State of the art and future evolutions
Fabrizia Luongo

15.30-16.00 Guided surgery: the clinician's point of view
Alessandro Greco

16.00-16.30 *Coffee break*

16.30-17.00 Guided surgery: the dental technician's point of view
Alberto Bonaca

17.00-17.30 Guided surgery in bone regeneration
Alessandro Cucchi

17.30-18.00 *Get together at exhibition hall*

SATURDAY, SEPTEMBER 16

09.00-09.15 Introduction

09.15-10.00 Digital Technologies and Artificial
Intelligence
Reinhilde Jacobs

10.00-10.30 Intraoral scanner : indication and limitation
Andrea Bevilacqua

10.30-11.00 Hands on sessions and coffee break

FULL DIGITAL PROSTHESIS

11.00-11.30 Prosthesis and new materials in the digital era:
the clinician's point of view
Roberto Sorrentino

11.30-12.00 Prosthesis and new materials in the digital era:
the dental technician's point of view
Luigi De Stefano

12.00-13.30 Round-table: planning the generational shift

GENERAL INFORMATION

LOCATION

Hotel Royal Continental
Via Partenope, 38, 80121 Napoli

REGISTRATION

ANDI Member	Free	
DDS Member	Free	
Student*	Free	
Resident**	Free	
	<i>After 31/06</i>	<i>Before 01/07</i>
ANDI non member	€150	€220

**Attendance certificate must be attached*

***Attendance certificate signed by the director of the graduate school must be attached*
